

SGSC2DW SideStream EtCO₂ Module

The SGSC2DW Module is used to monitor the EtCO₂, respiration rate and real-time capnography of intubated and non-intubated patients

Features

- > High precision, support side flow and micro flow applications
- > Working life of continuous pumping is >20000 hours
- > Rise time is less than 180ms; system response time is < 2s
- > Automatic zero calibration, the measurement of respiratory rate reaches 150rpm
- > Dehydration bottle prevents water and secreted liquid from entering the module
- > Automatic atmospheric pressure, temperature, manual anesthetic gas compensation, and manual btps compensation.
