

SGSC2D TiniStream® EtCO2 Module

The SGSC2D Module is used to monitor the EtCO₂, respiration rate and real-time capnography of intubated and non-intubated patients

Features

- > High precision, support 50ml/min applications
- > Working life of continuous pumping is >20000 hours
- > Rise time is less than 180ms; system response time is < 2s
- > Automatic zero calibration, the measurement of respiratory rate reaches 150rpm
- > The TiniLine® 8 filter with patent designed by Witleaf, can remove vapor, mucus and bacteria in the sampling line
- > Automatic atmospheric pressure, temperature, manual anesthetic gas compensation, and manual btps compensation.
